Introducing PremierOne Germicidal UV Light for Forced Air Systems

The Environmental Protection Agency reports that indoor air can be two to five times more polluted than the worst outdoor air.

You may not be able to see, smell or touch it, but air pollution is impacting the health of your family.

- ✓ High-intensity Germicidal UV sterilizes harmful germs, mold and viruses that forced air systems distribute throughout your home.
- ✓ The ducting is the best place to kill the germs, viruses and mold.
- ✓ Hospitals nationwide use Germicidal UV Lights to purify air.
- ✓ Helps reduce spread of colds and flu.
- ✓ Helps to keep your AC and heating equipment cleaner and working more efficiently.
- ✓ Pair with a HEPA filter to maximize power.
